linkedin.com/in/john-lorenzo-tapia

- Passionate Computer Science undergraduate with hands-on training in IT systems, computer networks, and technology infrastructure
- Specializing in IT management and cybersecurity, actively pursuing entry-level opportunities in IT support, systems administration, or information security
- Demonstrated competence in programming, IT management, and cybersecurity through university and personal projects, showcased in the portfolio at tapeau.github.io

Skills

- **IT Management**
 - Install, configure, and maintain hardware, software, and operating systems across Windows, Linux, and macOS, with end-to-end troubleshooting, help desk support, and customer service
 - Administer IT infrastructure services, including systems administration, user provisioning, and identity and access management with directory services such as Active Directory and OpenLDAP
 - Manage cloud computing, virtualization, server administration, data backup, and disaster recovery, with vendor and hardware selection to plan and improve IT processes
- **Programming**
 - Automate IT tasks and infrastructure workflows through IT automation, scripting, and configuration management using Ruby and Chef
 - Manage source code with Git version control, supporting collaborative development, technical writing, and software documentation
 - Operate command-line interfaces on Windows and Linux for software installation, system monitoring, process management, and debugging
- **Cybersecurity**
 - Identify and mitigate threats, attacks, and vulnerabilities, including malware, social engineering, and application attacks, through risk analysis, threat management, and mitigation strategies
 - Utilize security technologies such as firewalls, intrusion detection systems, and endpoint security to design secure network architectures with defense in depth
 - Apply cryptography, encryption, public key infrastructure (PKI), and authentication, authorization, and accounting (AAA) to enforce access control, data security, compliance, and security policies

Education

- **De La Salle University** Manila, Philippines
B.S. Computer Science, Major in Network and Information Security 2021 - 2027
 - Relevant IT management coursework: Innovation and Technology Management, Information Management, Introduction to Operating Systems, Introduction to Computer Networks, Introduction to Distributed Systems, and Server Application Development
 - Relevant cybersecurity coursework: Introduction to Security, Advanced and Offensive Security, Defensive Security, Secure Web Development, Cyber Threat Analysis, and Cryptography
